Maintained Interactive Running Man Signage

Product Overview:

---

The Vizybell Running Man series is a new innovative contemporary emergency EXIT sign. As well as it being a conventional exit sign, it is also capable of interacting with an analogue addressable alarm system that will automatically change the unit from Green EXIT state, indicating a safe path of egress, to a flashing Red EXIT state, indicating that the escape route is no longer available due to a possible fire.

The Vizybell Running Man series has been designed to comply with the building code whereby conventional methods are installed as 'alternative solutions' utilising two separate units fail to do so.

The Running Man series has a sleek contemporary design to suit the most modern fitouts and is simple and easy to install in both a ceiling or wall mount application
